P&L FEASIBILITY · PROGRAM COMPANY · FIVE YEARS

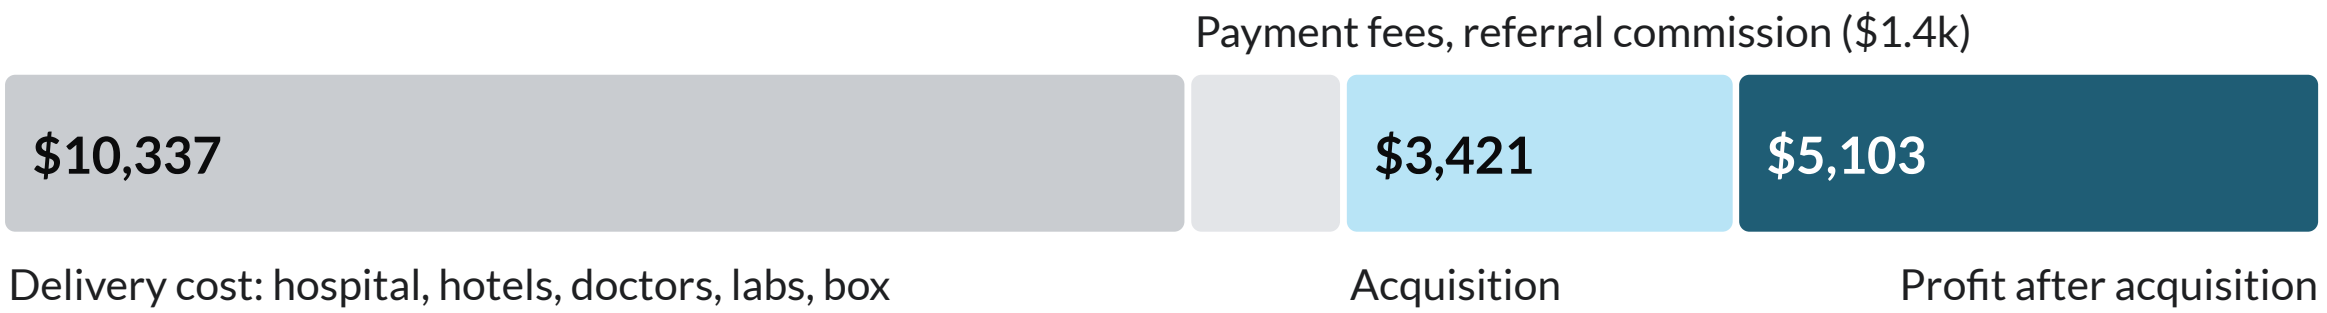

A client pays $20.2k and costs $10.3k to serve. EBITDA turns positive in year four.

FUNDING TO RAISE	EBITDA POSITIVE	YEAR-5 REVENUE
$1.0–1.1M	**Year 4**	**$21.3M**
Base case, incl. 25% buffer	Cash flow positive in year 2	17% EBITDA margin

ONE CLIENT

Where one client's money goes

Client pays $20,215 in year one

CLIENT CONTRIBUTION

$8.5k

42% of price, after partners and fees

PROFIT AFTER ACQUISITION

$5.1k

per client, before team and overheads

PAYBACK

4.8 months

to repay acquisition

RENEWING CLIENT

$7.4k

contribution; no acquisition, no referral

01 / PACKAGES AND PRICE

Three packages, two service levels

Annual

1 VISIT A YEAR

STANDARD	PREMIUM
$12,500	$21,500

First-time clients and long-haul markets

40% of clients

Summer–Winter

2 VISITS A YEAR

STANDARD	PREMIUM
$17,500	$29,500

US clients replacing two holidays

35% of clients

Seasonal

3 VISITS A YEAR

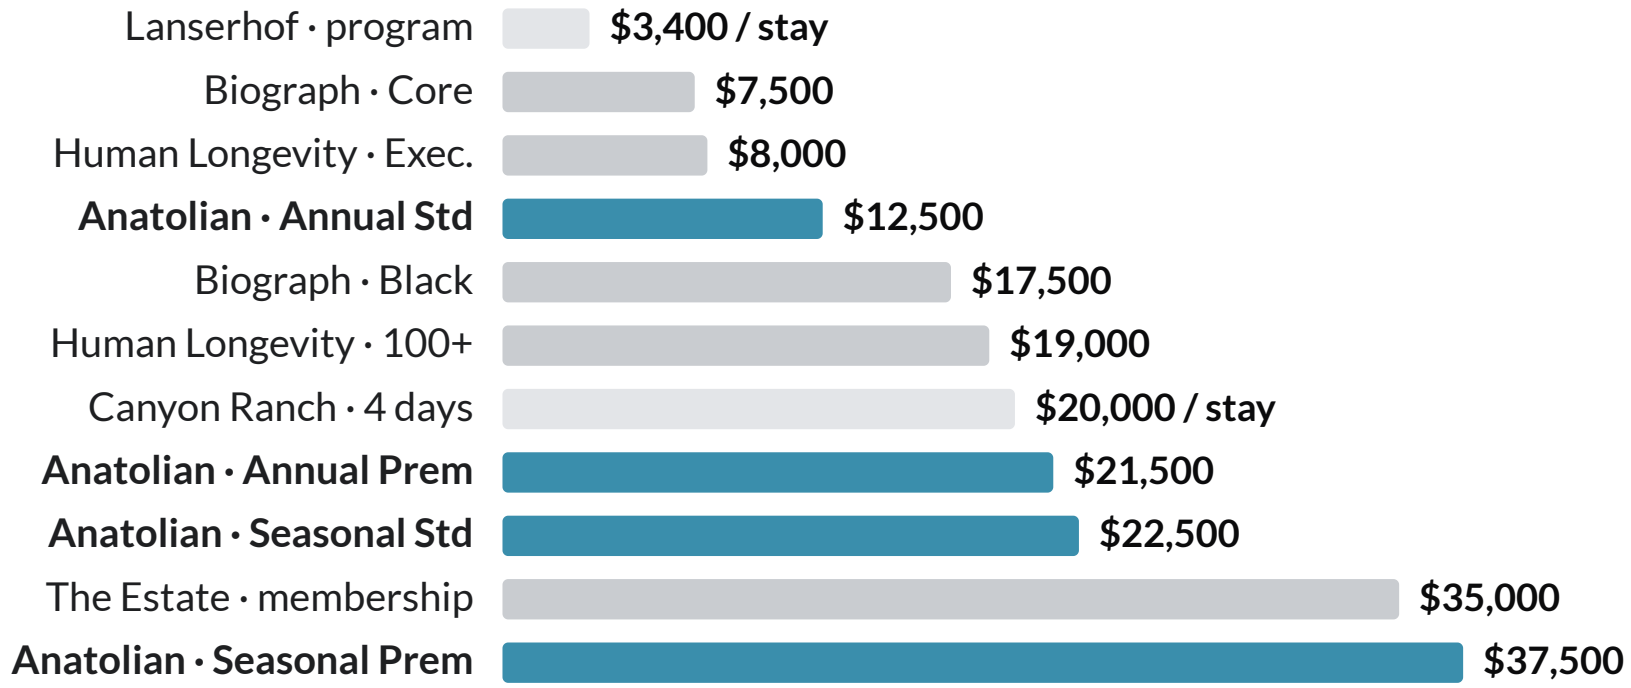

STANDARD	PREMIUM
$22,500	$37,500

Europe, UK and Gulf, 3–5 hours away

25% of clients

01 / PACKAGES AND PRICE

Above remote programs, below destination clinics

Grey: competitors per year. Light grey: per stay. Blue: proposed Anatolian prices.

01 / PACKAGES AND PRICE

Pricing rules in the model

SERVICE LEVEL

30% choose Premium

Luxury hotels, private experiences and longer physician sessions, at a higher price.

FOUNDING COHORT

−15% in year one

Pilot clients pay less in return for feedback and anonymised case data.

RENEWAL

90% of list price

Clients who stay a second year pay less; year two starts with a full re-measurement.

COMPANIONS

15% of clients, −20%

Partners who join with their own protocol pay 80% of list and cost nothing to acquire.

CLINICAL ADD-ONS

30% buy, $1,800 each

Sleep program, glucose sensor, mole mapping, therapy; delivered by partners.

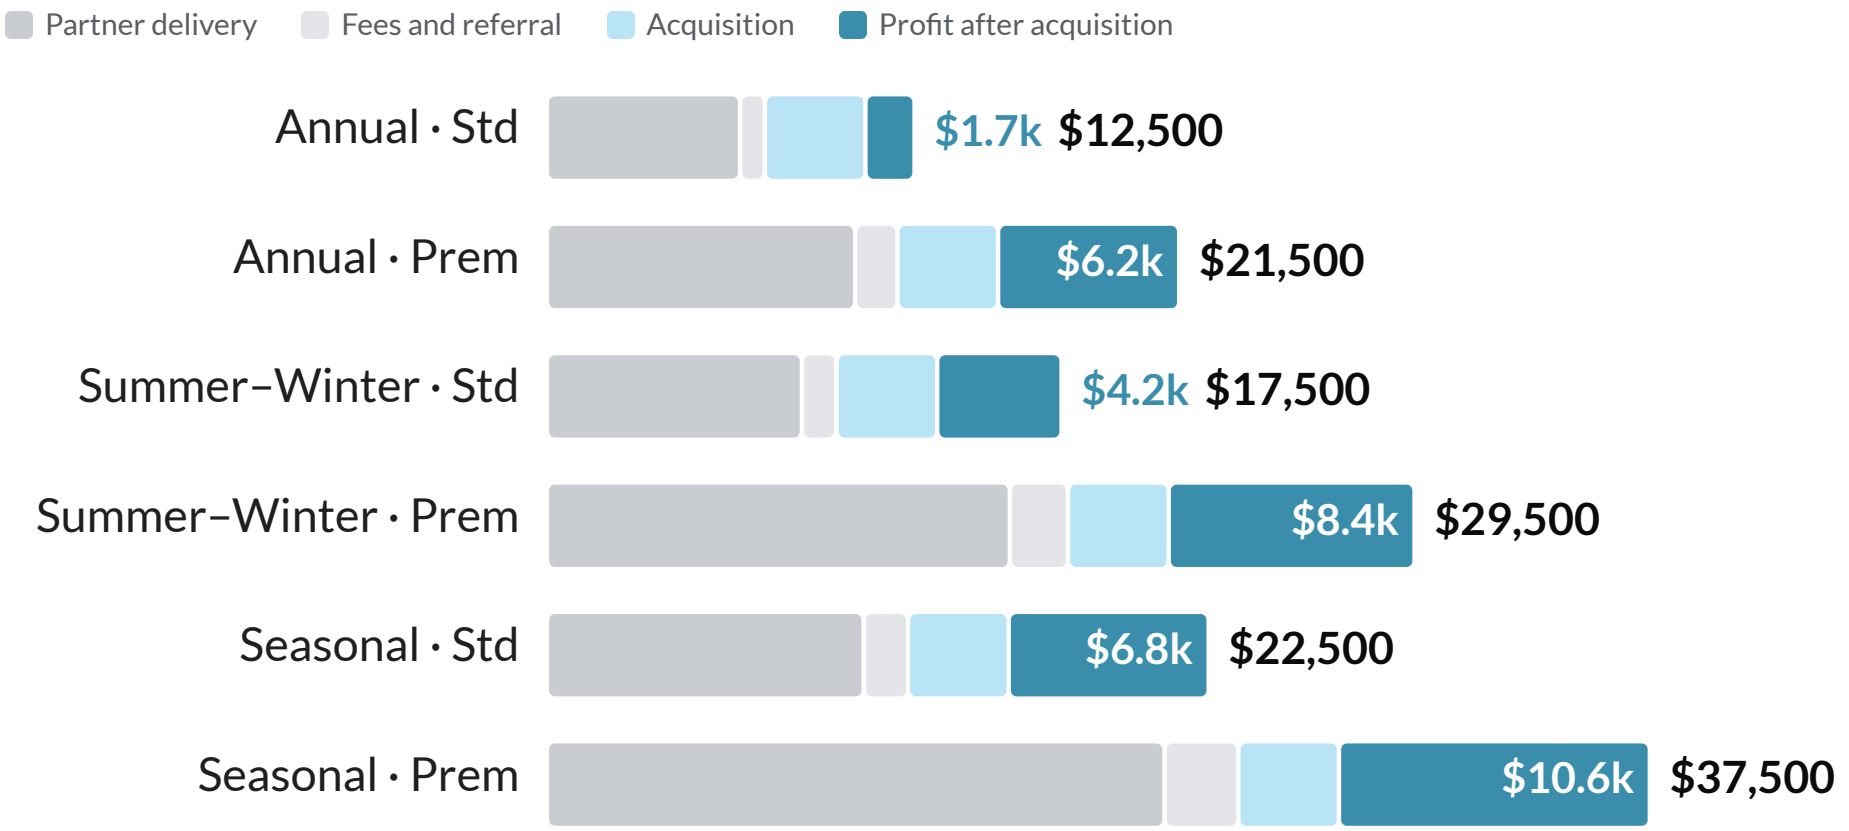

PRICE INCREASES

+5% a year

List prices rise from year two; Türkiye costs in dollars rise 8% easing to 2% a year.

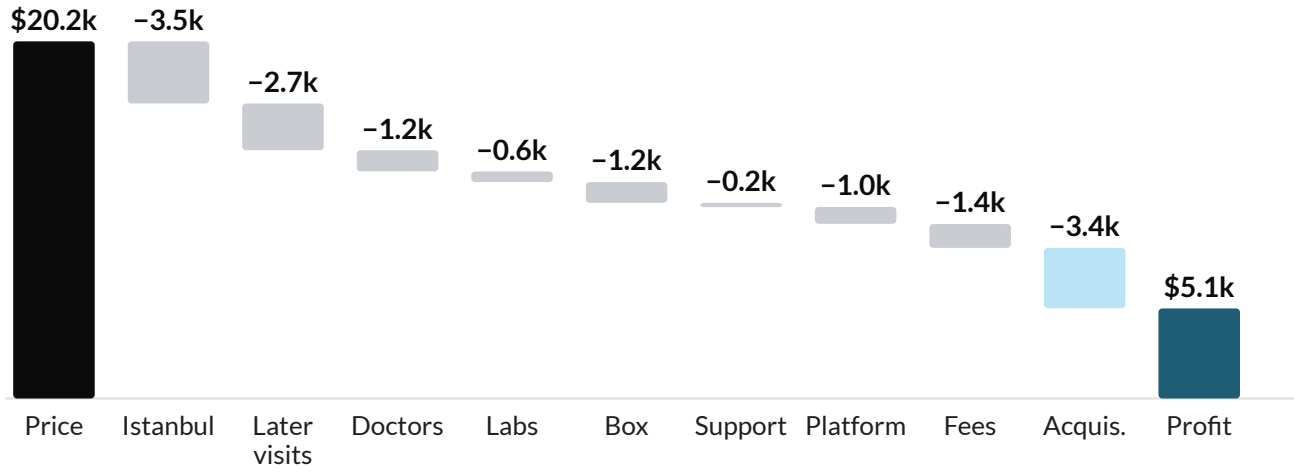

02 / UNIT ECONOMICS

Every package pays back its acquisition cost

02 / UNIT ECONOMICS

The weighted client, step by step

- **Annual Standard is the weakest:** $1.7k profit after acquisition, 8.1 months to repay. An entry product.
- **Extra visits pay:** a second visit adds $5,000 of price for $2,100 of cost.
- **The monthly box** is the biggest cost outside visits. $20 less a month adds $240 per client.
- **Renewals drive profit:** $7,402 per renewing client.

03 / GROWTH

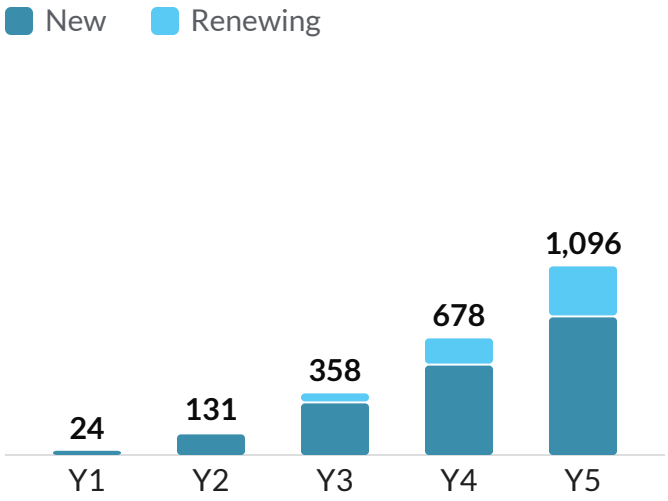

From 24 pilot clients to 800 a year

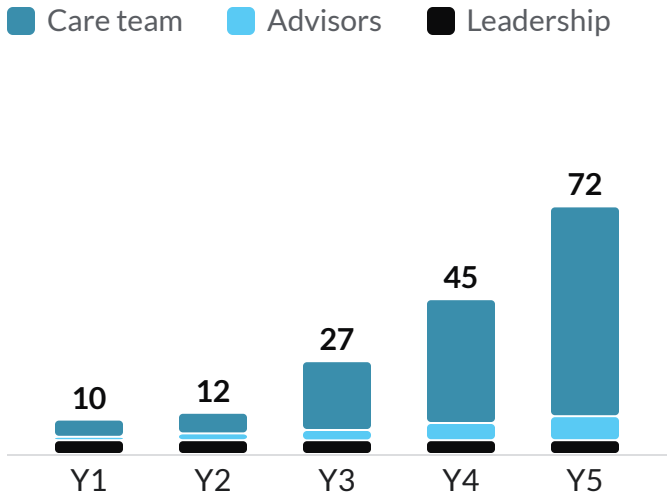

QUALIFIED LEADS, Y5
4,420
85 a week (32 in Y3)

LEAD TO CLIENT
10%
one in ten qualified leads buys

COST PER LEAD
$500
the same in every year

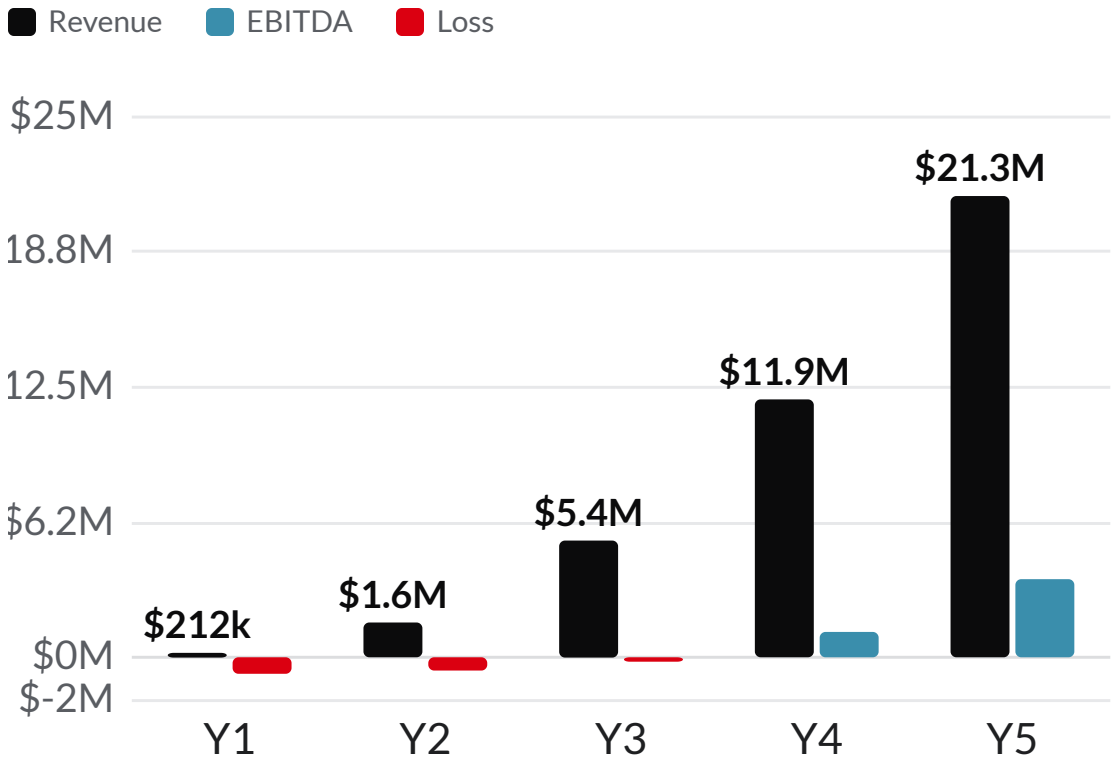

NEW CLIENTS, Y5
800
plus 35% via referral partners and 15% companions

03 / PROFIT AND LOSS

EBITDA turns positive in year four

USD K	Y1	Y2	Y3	Y4	Y5
Revenue	**212**	**1,614**	**5,411**	**11,937**	**21,346**
Gross profit	(30)	433	1,523	3,746	7,101
EBITDA	**(762)**	**(613)**	**(200)**	**1,179**	**3,618**
EBITDA margin	n/m	(38%)	(4%)	10%	17%
Net profit	(762)	(613)	(200)	1,179	2,812

- **Pilot year loses $0.76M,** incl. $197k set-up.
- **EBITDA turns positive in year four** ($1,179k); $3.6M in year five.
- **No clinic to carry:** overheads are 2% of revenue in year five.

04 / CASH AND FUNDING

The base case needs $1.0M to $1.1M

RAISE · PREPAYMENTS USED

$0.99M

monthly low point $0.79M in month 18

RAISE · WITH PREPAYMENT RESERVE

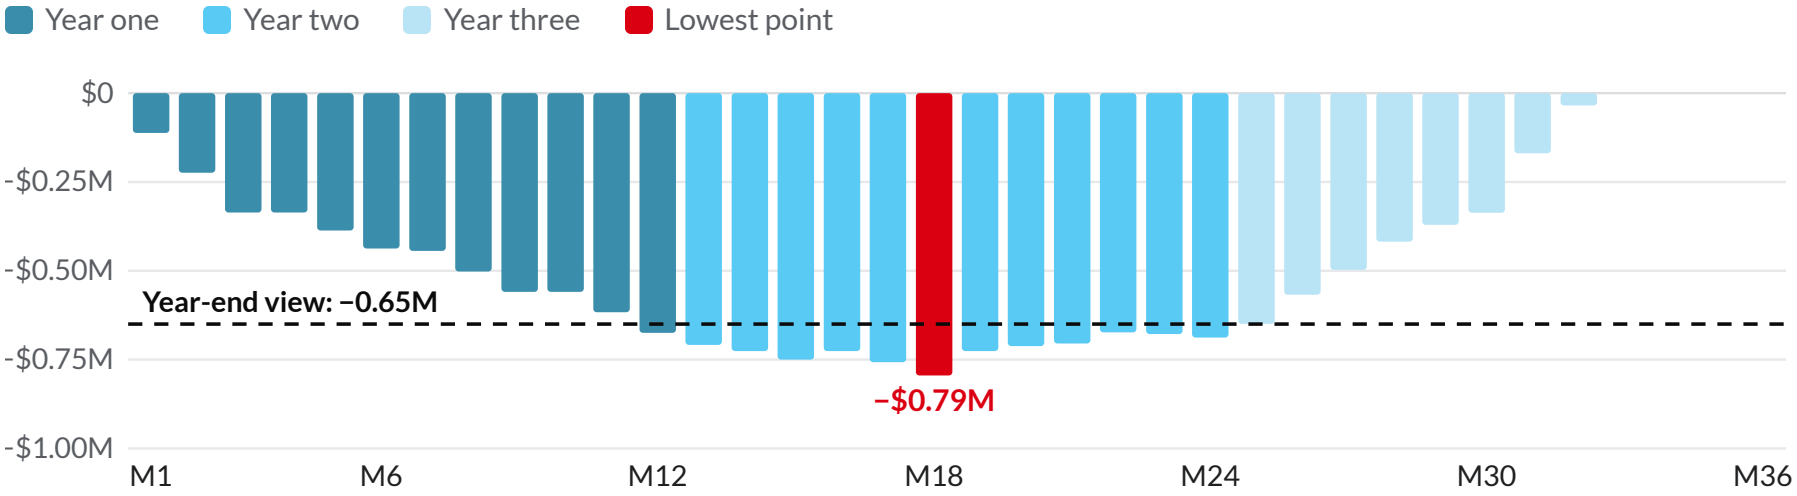

$1.07M

50% of undelivered client cash held in year one, 10% from year three

CASH FLOW POSITIVE

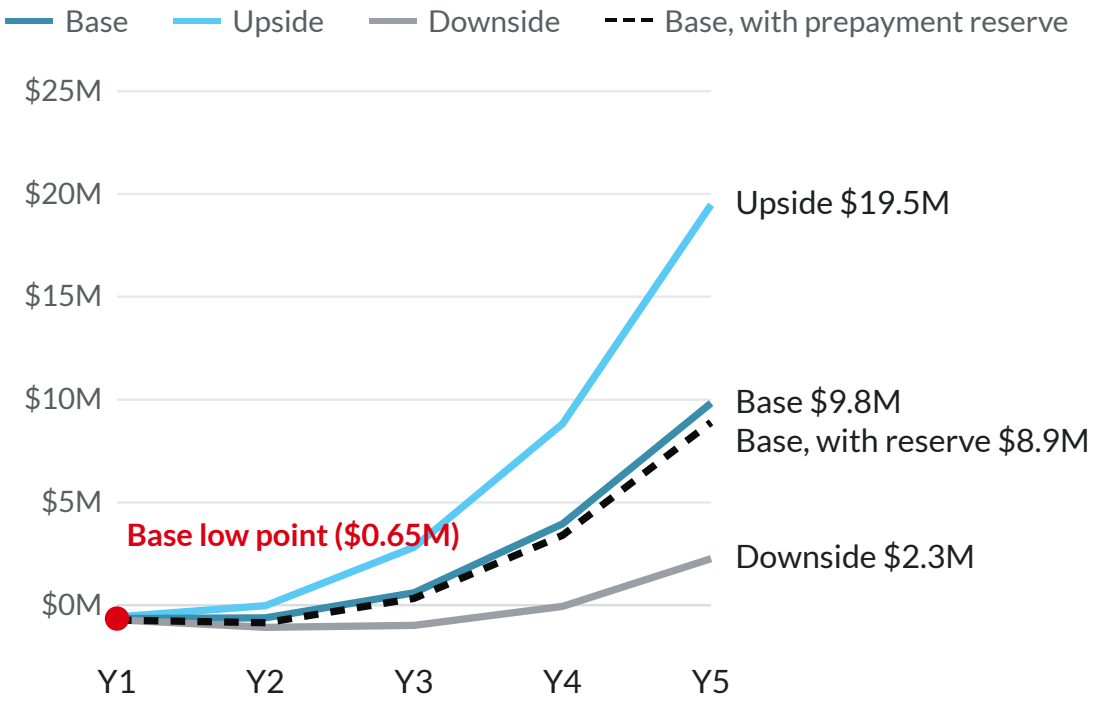

Year 2

clients pay 70% up front

04 / CASH AND FUNDING

Five years, three scenarios

	DOWN	BASE	UP
New clients, Y5	480	800	1,080
Revenue, Y5 (USD M)	11.8	21.3	31.2
EBITDA, Y5 (USD M)	0.69	3.62	8.03
EBITDA positive from	Y5	Y4	Y3
Raise, prepayments used, year-end view (USD M)	**1.34**	**0.81**	**0.71**
Raise, with prepayment reserve (USD M)	**1.52**	**1.07**	**0.84**
Five-year net profit (USD M)	(1.72)	2.42	8.36

Downside: 60% volume, 1.15× acquisition cost, 5% lower prices, 40% renewal, partner costs +5%. Upside: 135% volume, 0.85× acquisition cost, 5% higher prices, 50% renewal, partner costs −5%.

04 / CASH AND FUNDING

Year one, and what drives the need

Year one: where the money goes

Partners, fees, commissions	$150k
Care team (pilot minimum)	$92k
Sales and marketing	$166k
Leadership and overheads	$321k
One-off set-up	$197k
Contingency and timing	$85k
Cash in from pilot clients	$361k
Net cash need, end of year one	$650k

- **The monthly view goes deeper:** cash bottoms out in month 18 at $0.79M, $145k below the year-end figure.
- **New markets cost money up front:** $75,000 to open each market after the first, plus $20,000 a year to run it.
- **Prepayments used** is normal for prepaid programs, but refunds must then be paid from new sales; the **reserve** holds back 50% of undelivered client cash in year one, 25% in year two, then a 10% refund float.

05 / WHAT MUST BE TRUE

Four things must hold

DEMAND

300

base: new clients in year three

Enough clients to cover fixed costs

BREAK-EVEN
~159 a year

From 1,658 qualified leads at 10%.

ACQUISITION COST

$5,000

base: per marketing-acquired client, year 3

Cost of winning a client stays in range

YEAR-3 PLAN STILL BREAKS EVEN UP TO
~$10,800

Held flat from year one to year five.

RENEWAL

45%

base: renew into year two

Clients come back for a second year

DOWNSIDE CASE
40%

Of 100 clients, 45 start year two, 18 year three.

PARTNER RATES

$10,337

base: partner cost per client a year

Hospital and hotel rates hold

IF RATES RISE 10%
+$1,034

Fixed in USD for three years per contract. Each 10% rise weighs like a 6% price cut.

05 / SENSITIVITY

Price and acquisition cost decide the volume needed

Clients a year to break even clients

Acquisition cost per client, USD	WEIGHTED FIRST-YEAR PRICE, USD K				
	16.2k	18.2k	**20.2k**	22.2k	24.3k
2,500	281	180	132	105	86
3,750	342	203	144	112	92
5,000	438	233	159	121	97
6,250	607	274	177	131	104
7,500	990	332	200	143	111

Profit per new client USD k, after acquisition

Acquisition cost per client, USD	WEIGHTED FIRST-YEAR PRICE, USD K				
	16.2k	18.2k	**20.2k**	22.2k	24.3k
2,500	3.0	4.9	6.8	8.7	10.6
3,750	2.2	4.1	6.0	7.8	9.7
5,000	1.3	3.2	5.1	7.0	8.9
6,250	0.5	2.4	4.2	6.1	8.0
7,500	−0.4	1.5	3.4	5.3	7.2

Base in the middle: acquisition cost $5,000 (year 3), price $20,215. Columns: price −20%, −10%, base, +10%, +20%. Rows: cost ×0.5, ×0.75, base, ×1.25, ×1.5. Blue good, red weak.

05 / RISKS

What could break the plan

DEMAND

Clients come slower

At 60% of planned volume, EBITDA still turns positive in year 5; the pilot measures real conversion first.

PARTNER COSTS

Hotel and hospital prices in dollars

Türkiye costs rise faster than the lira weakens. Fix partner rates in dollars per program year.

PRODUCT MIX

Too many Annual Standard clients

The lowest-value product. Upgrades at the year-end review are the fix.

REGULATION

Claims, supplements, telehealth

Rules differ by market; the core protocol depends on neither the box nor one channel.

METHOD

How the model is built

- **Scope:** the program company only. It sells the program, employs the care team and pays partners; it owns no clinic.
- **Timing:** each program runs 12 months, half recognised in the enrolment year, half in the next.
- **Demand:** qualified leads × 10% conversion, plus referral clients and companions. 5% of sign-ups cancel before the first visit; 3% withdraw mid-program with a pro-rata refund.
- **Markets and months:** 4 markets by year four, each with entry and running costs; the first 36 months are also modelled monthly.
- **Cash:** 70% paid at enrolment, the rest at month six; 65% of partner costs paid in the enrolment year.
- **Currency and tax:** USD excl. VAT and flights; USD/TRY 49.5; 25% tax after loss carry-forward; no grants.

A feasibility model for a program in design. Partner rates are estimates until contracts are signed; platform fees are placeholders. Not investment, tax or legal advice.
